Cherokee Nation Lauded for Hepatitis C Elimination Effort

One of the largest Native American tribes is the first community in the US to implement a hepatitis C elimination program to treat its citizens; federal officials say the initiative could serve as a national model.

Inslee unveils first-in-nation approach to eliminate hepatitis C in Washington by 2030

State Health Department says it has plan to help eliminate hepatitis C in Louisiana
Consensus Statement on Hepatitis C Elimination in New York State
March 7, 2017

Call to Action
New York State (NYS) faces a growing hepatitis C epidemic with a rising death toll. Given the availability of new highly effective, well-tolerated curative treatments, we can no longer settle for a low cure rate that perpetuates the high fiscal and human costs of inaction. The committee that organized the NYS Hepatitis C Elimination Summit, along with the other providers, community-based organizations and individuals living with and affected by hepatitis C that sign this consensus statement, call on Governor Andrew Cuomo, the NYS Legislature, and industry partners to make a joint commitment to hepatitis C elimination, and for appointment of a formal NYS Hepatitis C Elimination Task Force.

END THE EPIDEMICS
Californians Mobilizing to End HIV, HCV, and STDs

Community Consensus Statement
December 18, 2018

We, the undersigned organizations, call on Governor-elect Newsom and the California Legislature to act now to end the HIV, HCV, and STD epidemics.

THE OPPORTUNITY: California is at an unprecedented moment in response to HIV, hepatitis C (HCV), and sexually transmitted diseases (STDs). With highly effective treatments and proven prevention tools, California can now dramatically reduce new transmissions, improve the health of people living with these conditions, and bring these epidemics to an end.
KEY INGREDIENTS FOR HEPATITIS ELIMINATION

- Funding
- Surveillance
- Comprehensive Harm Reduction
- Treatment Access
- Community Engagement/
  Meaningful Participation from Most Affected Communities
CRITICAL INVESTMENT IS NEEDED IN HEPATITIS INFRASTRUCTURE TO MAKE ELIMINATION A REALITY

14 states receive funding from CDC for HCV surveillance

Only 20% of persons 15-29 years with HCV live within 10 miles of an SSP

Treatment restrictions still exist in some form in most states

ASTHO ELIMINATION PLANNING PROJECT

• Cooperative agreement with the Centers for Disease Control and Prevention (CDC)
• 19 states funded in three phases
  – Phase One: Disease progression models
  – Phase Two: In-person meeting in July
  – Phase Three: Demonstration site projects
• Learning Community
• Cooperative agreement with Centers for Disease Control and Prevention
• Purpose: Enhance health department capacity to eliminate viral hepatitis
• Upcoming launch in 2019
• Features
  – Direct technical assistance
  – Collective learning & engagement
WE NEED TO MAKE HEPATITIS A PRIORITY

MAKE HEPATITIS A PRIORITY
